Summer Internship / Training

CipherSchools – Data Structures & Algorithms (DSA)

June 2024 - August 2024

Gained knowledge of DSA concepts including sorting algorithms, dynamic programming, trees, graphs, and linked lists. Enhanced algorithmic thinking by solving problem-solving challenges.

Projects

Noctave - AI Study Planner for Night Owls | Next.js, Google Gemini, Supabase, Analytics APIs

December 2025 – January 2026

- Built an AI-powered study planning web application that analyzed user sleep cycles, productivity patterns, and habits to generate personalized study schedules, improving study consistency by 45% in test users.
- Integrated Google Gemini to perform behavior-based schedule optimization and productivity prediction, dynamically adjusting plans based on user engagement and performance trends.
- Designed a habit-tracking and analytics system using Supabase, enabling real-time progress tracking, adaptive reminders, and data-driven insights to reduce missed study sessions by 35%.

API Testing Framework for Q&A Platform | REST Assured, Postman, JSON Server, Java

September 2025 – October 2025

- Developed and executed 100+ API test cases validating CRUD operations, authentication flows, pagination, and role-based access control.
- Implemented negative and boundary test scenarios, uncovering data-validation and authorization defects with a 30% defect detection rate.
- Created reusable Postman collections and automated REST Assured suites, improving API regression efficiency by 2x.

Pathora - Smart Tourist Guide | Next.js, React, Supabase, Tailwind CSS

June 2025 – July 2025

- Developed an AI-driven full-stack travel planner integrating Google Gemini and OpenRouteService APIs for dynamic itinerary creation, conversational trip planning, and optimized route visualization.
- Built and deployed a scalable Supabase (PostgreSQL) backend with secure authentication, real-time synchronization, and serverless Edge Functions for automated email delivery and user data management.
- Engineered a responsive, accessible frontend using Next.js and Tailwind CSS, ensuring seamless performance and usability across diverse platforms.
- LiveDemo: <https://pathora.netlify.app/>

Debatify - AI-Powered Debate Platform | Next.js, Tailwind CSS, Supabase, Google Gemini

June 2025 – July 2025

- An interactive web platform that allows users to engage in structured AI-powered debates, either live or turn-based, across various topics.
- Designed and improved a responsive debating platform using Next.js, Tailwind CSS, and Supabase for authentication and data storage.
- Integrated Google Gemini for real-time AI argument generation, fallacy detection, and argument strength analysis.
- Features include topic suggestions, saved debates, email support via Resend, and seamless user experience across devices.
- Purpose: Promote critical thinking, improve argumentation skills, and offer an educational tool for structured debate practice.

Farm Fresh - Local Farm Produce Delivery System | React.js, Vite, Redux, CSS

September 2024 – October 2024

- Created a fully responsive React-based web application using Vite and CSS, connecting 100+ local farmers with 5000+ urban consumers and enabling direct farm-to-table transactions.
- Led frontend development with a focus on intuitive UI/UX design, reducing order placement time by 40%, boosting engagement, and increasing conversion rates by 25%.
- Implemented Redux for efficient state management, optimizing API response times by 30% and ensuring a seamless shopping experience across devices, driving a 70% mobile-first adoption rate.

Certificates

CipherSchools - Unity & Game Development

July 2024

Coursera - Dynamic Programming, Greedy Algorithms

May 2024

Coursera - Approximation Algorithms and Linear Programming

May 2024

Coursera - Generative AI with Large Language Models

April 2024

Coursera - Programming in C++: A Hands-on Introduction

February 2024

Udemy - Mastering Data Structures and Algorithms using C and C++

February 2024

Technical Skills

Languages: C++, C#, JavaScript, Java, Python

Frameworks: React.js, Node.js, JUnit, Eclipse, Maven, Selenium

Tools: Unity, Eclipse IDE, Appium Inspector, SoapUI, Postman, Jira, Google Docs/Sheets, Git, GitHub

Databases: MongoDB, MySQL

Skills: Agile & Scrum, Project Tracking, Adaptability, Time Management, Team Communication

Education

Lovely Professional University Punjab

2022 – Present

Computer Science and Engineering

Jalandhar, Punjab

Nochad Higher Secondary School

2019 – 2021

12th with Science — Percentage: 91.25%

Kozhikode, Kerala

St Meera's Public School

2018 – 2019

10th with Science — Percentage: 94%

Kozhikode, Kerala
